कक्षा में करवाया सम्पूर्ण पाठ्यक्रम याद करो।

MATHS

General Instructions:

- Submit your work in a file/folder with a cover page. Present your work neatly.
- The work should be hand written.
- Solve the questions in the worksheet itself or in space provided for each question. Use the perforated sheets, if required.

Manage your work in such a way that a little work is done every day to avoid piling it for the last moment.

The Digital India programme is a flagship programme of the Government of India with a vision to transform India into a digitally empowered society and knowledge economy.

Aadhaar program was launched with a main objective to provide universal identity to every Indian resident. People can now get the card with much ease as its acceptance as a mandatory document for various initiatives has been officially made. In addition to this it will help in reducing the corruption since every individual carries only one unique number. (12 digit unique identity number).

Considering the increasing acceptance of Aadhaar card it is must for everyone to get it issued. It is believed that the card will further be given more importance as more and more government schemes are being launched requiring it as a mandatory document.

1. List some most important benefits of Aadhaar (12 digit unique identity number).
2. Everyone in your family will be having Aadhaar card number. Form the greatest and smallest 9 digit number by using digits of your aadhaar card number.

For eg. If your aadhaar number is 1224 3564 6798 then form greatest and smallest number by using digits 9,8,7,6,5,4,3,2,1.

3.write the number name of these numerals by putting commas between their periods in Indian and International system of number numeration.

4. Find the sum of place value of digits at tens place and hundred thousand place.

5. Find the difference between the place values of digits at one million and ten thousand place

ans) _____

5. Amita is not able to do these sums. Jolly is not able to do these sums. (join the two sentences)

ans) _____

Read the following passage and answer the question given below:

Just 130km from Delhi, at a small clinic on the highway, disposable needles and syringes are freely reused. The treatment for any minor ailment is an injection.

The doctor is a specialist in 'ear, nose, throat, skin, and children's diseases'. He is not aware that the contaminated needles could be carriers of hepatitis and HIV. They could also cause serious bacterial infections. Those who come to him ask no question, they take injection readily.

There could be any number of such clinics thriving in these areas. No one can say how many such doctors are reusing disposable needles and syringes and to what extent public health is endangered by this.

(source: The Times of India)

Answer the question given below:

(10 marks)

1. Mention a very risky activity going on in the clinic.

Ans) _____

2. What does the doctor specialize in?

Ans) _____
